TECHNICAL SKILLS

LANGUAGES

Java SQL JavaScript

BACKEND

Spring Boot Spring MVC JPA

Hibernate

API & SECURITY

REST APIs JWT Spring Security

FRONTEND / FULL STACK

React Node.js Express

MongoDB

CORE CONCEPTS

DSA DBMS OS CN

TOOLS

Git Maven Postman VS Code

Sumit Pandey

SOFTWARE DEVELOPER

PROFESSIONAL SUMMARY

Software Developer with strong backend and full-stack expertise in Java, Spring Boot, and the MERN stack. Skilled in designing scalable REST APIs, implementing JWT-based authentication, and building clean layered architectures. Solid foundation in Data Structures & Algorithms, DBMS, and system-level concepts, backed by hands-on projects and internships covering both backend development and data analytics. Passionate about writing efficient, maintainable code and continuously growing through real-world challenges.

EDUCATION

Post Graduate Diploma in Advanced Computing (PG-DAC)

74%

Aug 2025 – Feb 2026

Centre for Development of Advanced Computing (C-DAC) — Govt. of India Undertaking

IACSD – Institute for Advanced Computing & Software Development, Pune

COMPLETED

Bachelor of Technology – Computer Science & Engineering (B.Tech CSE)

76.2%

2021 – 2025

United College of Engineering and Management, Prayagraj

Dr. A.P.J. Abdul Kalam Technical University (AKTU)

COMPLETED

PROJECTS

Job Application Management System

Java · Spring Boot · MySQL · JWT

↗ Project Live

↗ Github Repo

- Designed layered architecture (Controller–Service–Repository) for clean code separation
- Implemented secure authentication & authorization using Spring Security and JWT
- Added robust exception handling & input validation for system reliability
- Built REST APIs with proper HTTP methods, status codes & request validation
- Integrated MySQL via Hibernate & JPA for optimized ORM and data handling
- Performed thorough API testing via Postman ensuring correctness and performance

PROJECTS

SmartShop – MERN E-Commerce Platform

MongoDB · Express · React · Node.js

↗ Github Repo

- Built full-stack e-commerce platform using MERN architecture for scalability
- Developed product management, shopping cart & order processing modules
- Handled complete CRUD operations with seamless frontend–backend API integration
- Implemented JWT-based authentication with role-based access for buyers and sellers
- Designed efficient MongoDB schemas improving query speed and data integrity
- Focused on responsive UI design for smooth and intuitive user interactions

INTERSHIPS

Java Full Stack Intern

Netcamp Solution Private Limited

• Developed backend services using Java and the Spring framework for a real-world application

• Built RESTful APIs, handled database integration, and wrote clean, maintainable code

• Gained practical exposure to software development lifecycle, team workflows, and best practices

Data Analyst Intern

Unified Mentor Private Limited

• Performed data cleaning and preprocessing on structured datasets to ensure analysis accuracy

• Extracted meaningful business insights from data to aid in strategic decision-making

• Built visualizations and dashboards to clearly communicate data patterns and trends

ADDITIONAL INFORMATION
